

Het voor de eerste keer aanvragen van een edubadge

De docent geeft de publieke URL van de badgeclass door aan de lerende.

Deze URL toont de inhoud van de badgeclass (metadata) en heeft een optie om deze aan te vragen.

The screenshot shows a web browser displaying the EduBadges page for a badge titled "Digestion and Defense". The browser's address bar shows the URL: <https://acc.edubadges.nl/public/6Rmn2lQGTpamTApjgkKWQ>. The page features a purple header with the "edubadges" logo on the left and a "Request" button on the right, which is highlighted by a yellow arrow. Below the header is a section for the badge's description, followed by details about the associated institution, the issuing body, the language of instruction, and the learning outcomes.

edubadges

 **Digestion and Defense** [Request](#)

Description

There are three main themes in this block: Gastroenterology, Infectiology, Immunology, and Health Law. It forms the bridge between 'Digest and defense year 1' (block 1.5) and the cluster abdomen year 3. Year one extensively dealt with normal anatomy and physiology of the digestive tract and the basic principles of microbiology and immunology. Year 3 will mainly deal with clinical reasoning, differential diagnosis, probability diagnosis and therapy. In order to be well prepared for this, year 2 will focus on pathophysiology. Selected clinical presentations will be used to discuss the most important principles and concepts of gastroenterology, infectiology and immunology, starting from the basic knowledge of physiology and anatomy obtained in year 1. The use of illness scripts (pattern recognition of disease) will be introduced as a basis for clinical reasoning. Where applicable, pathophysiological concepts will be reduced to different mechanisms of disease. Discussing pathophysiological concepts in the context of mechanisms of disease in the tutorial group will be an excellent preparation for clinical reasoning leading to differential diagnosis. Knowledge of the basis sciences is indispensable. Therefore, it is mandatory to refresh the knowledge from the block 'Digest and defense year 1' before the pre-discussion of each new case or task. There will be ample attention to psychosocial themes such as chronicity, ethics (organ transplant) and public health (outbreak management of infectious disease). The major procedure in the tutorial group will be PBL, incidentally in a multimedia approach. Activities in the tutorials will be supported by lectures, practicals and skills training, taking care of the best possible mutual consistency.

Learning outcome

- Explaining clinical symptoms of the most important diseases of the gastrointestinal system using (patho)physiological concepts
- Psychosocial and ethical aspects of selected diseases (addiction, chronicity)
- Cause and consequence of auto-immunity (general, with a projection on the gastrointestinal system)
- Microbiological en immunological aspects of major bacterial, viral, parasitological and opportunistic infections related to clinical presentation
- Antibiotics en resistance
- Global aspects of serious infections; import diseases
- hypersensitivity/allergy

What are the requirements to qualify for this edubadge?

No linked verified institution

Your eduID account is not linked to any verified institution. This is required to request edubadges.

For the English version, see below.

Hi **Joseph Weeler**,

Je hebt de volgende edubadge aangevraagd: Digestion and Defense.

Wacht alsjeblift op de issuer om je verzoek te accepteren.

Met vriendelijke groet,

Team Edubadges

Hi **Joseph Weeler**,

You have successfully requested the edubadge: Digestion and Defense.

Het aanvragen van een edubadge is daarmee gedaan. Je ziet deze terug in je backpack. Er wordt ook nog een bevestiging gestuurd naar het in eduID opgegeven mailadres.
