

PI distributes link for users to self-enroll

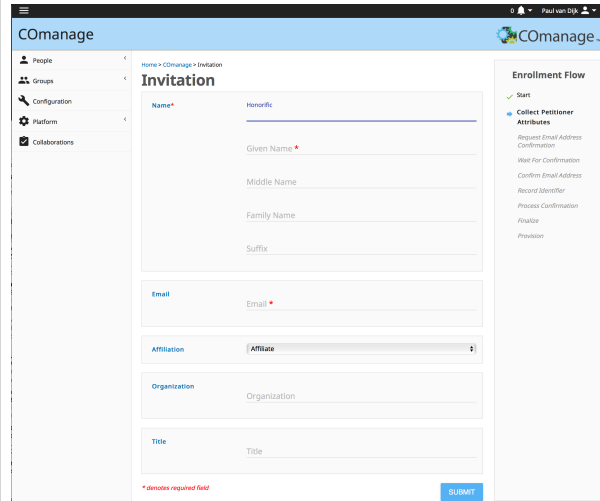

<p>1. The CO manager (i.e. an PI) clicks on People within his CO in COmanage and clicks Enroll as the sub option in the People menu</p>	<p>The screenshot shows the COmanage web interface. At the top, there is a blue header with the COmanage logo. Below the header, there is a navigation menu with several options: 'People', 'My Population', 'Organizational Identities', 'Enroll', and 'CO Petitions'. The 'People' option is currently selected, and its sub-menu is open, showing the same list of options. The 'Enroll' option is highlighted in blue, indicating it has been selected.</p>
---	---

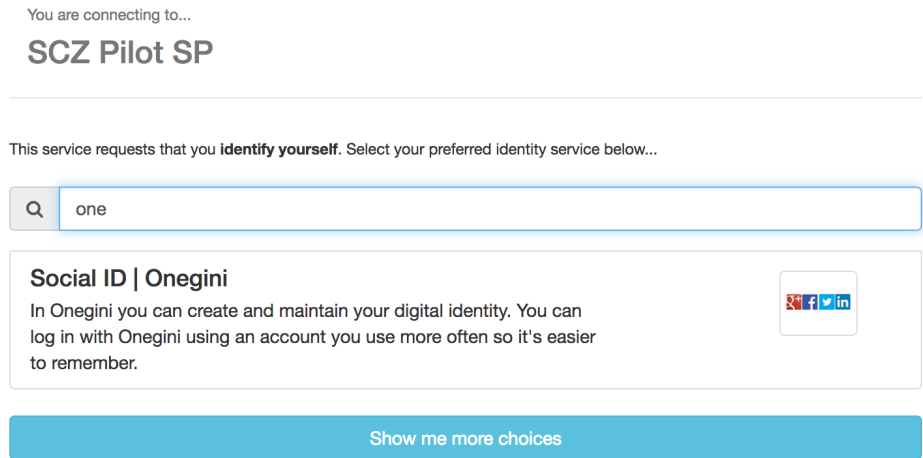

2. As he has already configured an Invitation enrollment flow, that flow is presented and can be started by clicking on: BEGIN.

3. The PI fills out the name and email address to which the invitation must be sent. The name is to personalise the invitation email

4. The user clicks the link in the invitation and either selects his home organisation or an IdP that supports social IDs (here: OneGini)

5. The user clicks the provider and needs to confirm the selection by clicking Proceed to Login

This service requests that you **identify yourself**. Select your preferred identity service below...

Social ID | Onegini

In Onegini you can create and maintain your digital identity. You can log in with Onegini using an account you use more often so it's easier to remember.

If you always use one and the same login provider for everything it might be a good idea to remember your choice by pressing *Login and use Forever*. Press *Start Over* to redo the search and pick another login provider.
