

v0.3

Changes:

Functional:

- CManage:
 - Bugfixes for the [Yoda](#) enrollment flows.
 - Bugfixes for the QRcode tokens.
 - The Terms and Conditions (T&C) for a CO are now stored within CManage, rather than just a link to the T&C.
- SAML:
 - Only CO-attributes are released to Service Providers (SP's).
 - Checks incoming logins for the correct attributes.
 - OIDC clients can be connected.
 - Fixed OIDC attribute handling.
 - Changing IdP-attributes are detected (first steps)
 - Logo's are no longer shown in WAYF.
 - Improve logging.
- Platform:
 - Plan to make platform [CoCo](#) & [R&S](#) compliant.
- Deploy:
 - Separate test and Google clients for test and pilot environment.
