How to make a Onegini account

If you don't have a home institution connected to SURFconext, you can use a Onegini account to log on to multiple services of SURFconext as a guest.

There are two different ways to register an account with Onegini:

1. Register an account with an existing social account (Facebook, Twitter, LinkedIn, Microsoft, Google). No extra username and password has to be remembered.
2. Register a Onegini account with a new username and password.

Register a Onegini account with a social account

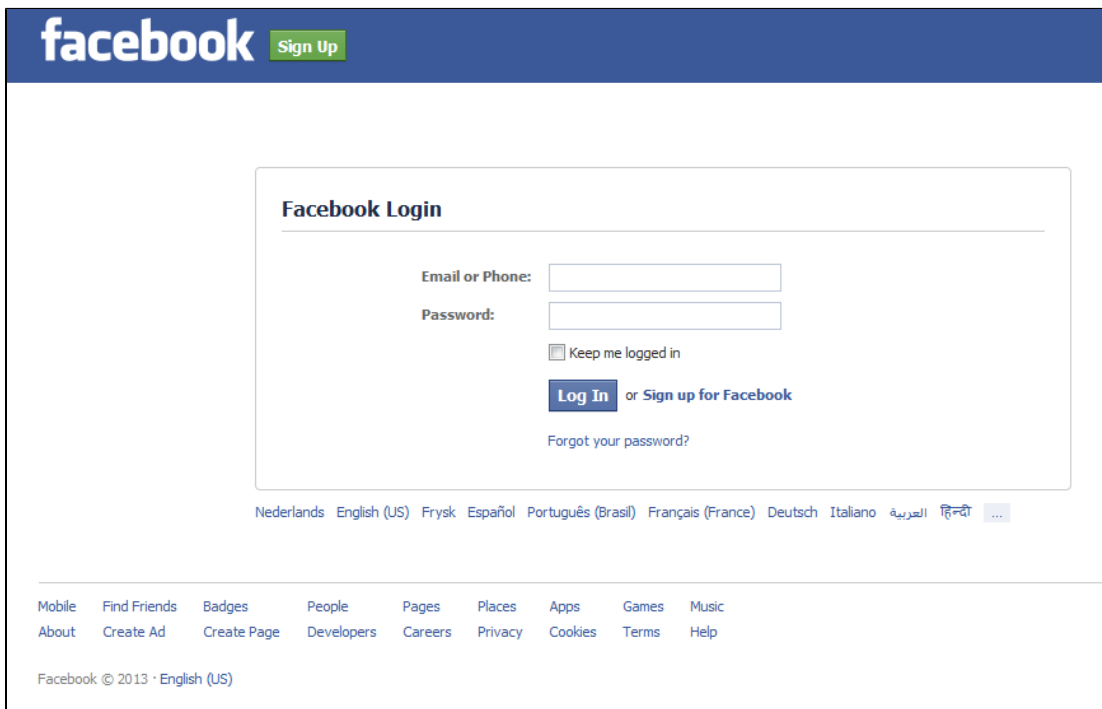

1. Go to <https://www.onegini.me/>

The screenshot shows the Onegini website interface. At the top, there is a dark header with the Onegini logo (a blue square with a white arrow) and the word "onegini" in white. To the right of the logo, the word "Nederlands" is displayed. Below the header, the main content area has a light gray background. It starts with the heading "Welcome to Onegini!" followed by a paragraph explaining that Onegini is a new way of logging in to access online services from companies like insurance agencies, financial companies, and web stores. A link "Read more..." is provided. Below this is a video player showing a preview of the Onegini interface. To the right of the video is a section titled "Getting started" with three bullet points: "Log in with an account from the list", "Create your digital identity", and "Share your digital identity with your companies". At the bottom of the main content area, there is a box with the text "Please select the account you want to use to login to Onegini:" followed by five social media icons: Facebook, Google+, LinkedIn, Microsoft, and Twitter. Below these icons is a link: "Click [here](#) if you prefer not to use a third party account".

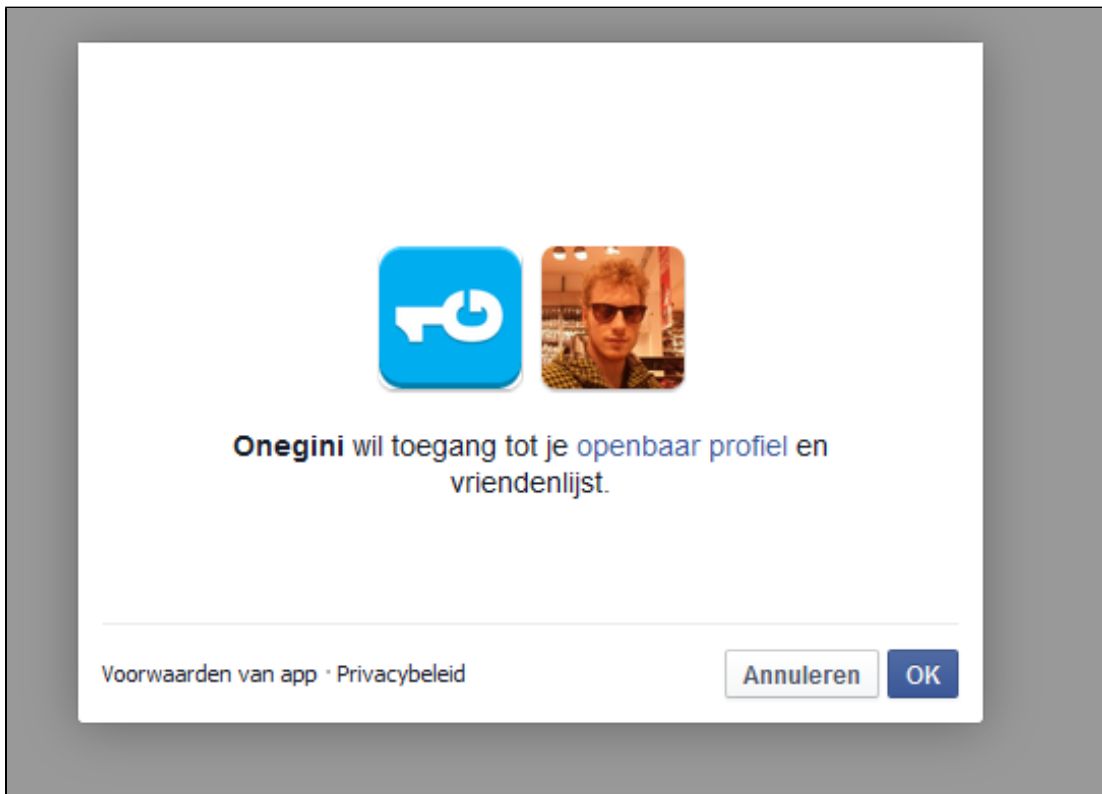

2. Select the social account you want to register with (from left to right: Facebook, Google, LinkedIn, Microsoft, Twitter).

The login page of the selected account will appear. Below you see an example of a Facebook login page.

3. Log in with your Facebook credentials and click **Log In**.

The next page tells you what information Onegini has access to.

! If you select LinkedIn, LinkedIn will ask you for permission to share your profile photo with Onegini. **SURFconext and Onegini do not use your profile photo!** Unfortunately we are unable to dismiss this message.

4. Click **OK**.

If your Onegini account has been successfully registered you will be redirected to your personal Onegini dashboard page.

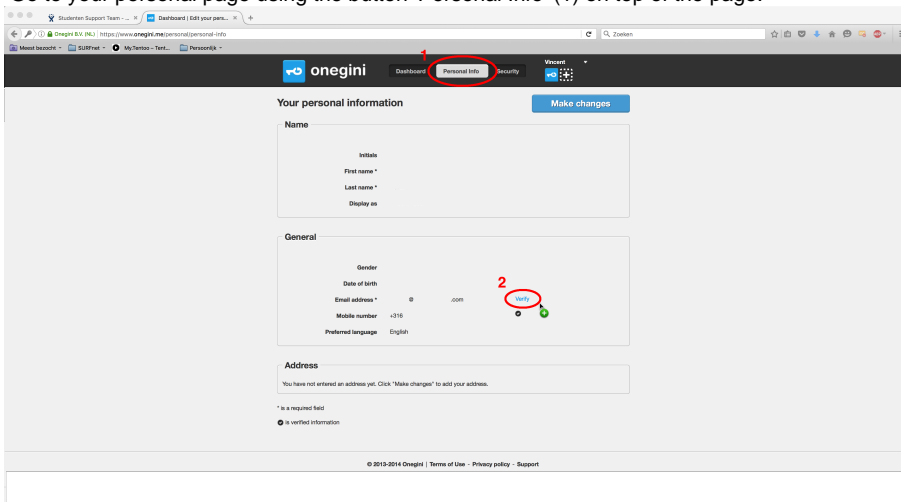

A social account can always be added by selecting the '+' at the top-right of your dashboard panel.

You will still have to confirm your mail address.

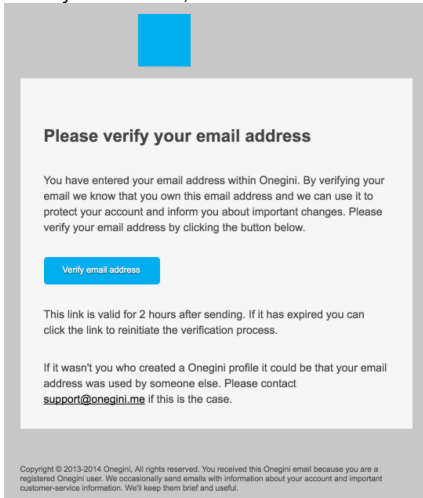

Confirm your e-mail address

After registering with Onegini your mail does not automatically get added to your profile. This will only happen after confirmation by the user. Since e-mail is necessary for many services, confirming immediately could be handy.

1. Go to your personal page using the button 'Personal Info' (1) on top of the page.

2. Click Verify (2) behind the field that states 'Mail Address'
3. Go to your mailbox, find the mail and click 'Verify email address'

Spam

The mail sometimes ends up in your spam folder.

Log in at a service of SURFconext with your Onegini account

1. If want to log in to a service like <https://www.edugroepen.nl> via SURFconext, choose Onegini for institution (type 'Onegini in the search bar). Next you log in with your social account or Onegini username and password.
