

Connect Google G Suite to SURFconext

An institution may start using Google G Suite (formerly [Google Apps](#)) as a communication and collaboration tool for its students and employees. An institution can manage their own Google G Suite domain. Google G Suite for education contains [many modules](#).

SURFconext can be used to provide federated login and group memberships to the Google G Suite domain, as well as SSO with other SURFconext connected services. This wiki is a starting point with technical and non-technical information on how to connect to Google G Suite.
