

v0.5

Changes:

- Introduce new component: LDAP Synchronization Connector (<https://lsc-project.org/doku.php>) which makes configuration of ldap for external services a lot more flexible
- Fix the user identifier for the Google IdP (**Note: Google-users will need to be re-enrolled in a CO!**)
- Add the [SAMLsources plugin for COmanage](#), which simplifies the use of SAML attributes (as received from the IdP from the enrolling user) in enrolment flows
- Update to [COmanage 3.1.1](#)
- Fix securityproblem in COmanage (<https://spaces.internet2.edu/display/COmanage/2018-05-30+Registry+Advisory>)

v0.5.2

Released: 2018-07-03

Changes:

- Fixed bug that prevented including a COU-attribute in an enrollment flow
- Allow adding an SSH key attribute in an enrollment flow
- Simplify entering of public ssh keys
