

Connecting your service to eduGAIN

eduGAIN interconnects identity federations around the world (interfederation), thus simplifying access to content, services and resources for the global research and education community. eduGAIN enables the trustworthy exchange of information related to identity, authentication and authorisation (AAI) by coordinating elements of the federations' technical infrastructure and providing a policy framework that controls this information exchange. eduGAIN is a service developed within the GÉANT project. Before you can offer your service through eduGAIN, make sure your service is up & running within SURFconext. Then proceed as follows:

- [Publish metadata and opt-in for eduGAIN](#)
- [Consume metadata](#)
- [Deploy discovery page](#)
- [Set required attributes / ACL](#)
- [Testing your eduGAIN SP](#)
