

Documentation for SPs connected to SURFconext

This documentation is meant for Service Providers who already have SURFconext as their *home federation*. These are Service Providers (from the Netherlands) that already operate within SURFconext. If that is not (yet) the case for you, please have a look at our [SURFconext documentation](#) first. You must be part of SURFconext before you can offer your service to other federations.

Before continuing it is highly recommended to have a (basic) understanding of eduGAIN first. Please refer to [eduGAIN explained \(EN\)](#).

The following pages explain the steps you must take as a Service Provider to work with eduGAIN.

- [Connecting your service to eduGAIN](#)
- [Signing the REFEDS Data Protection Code of Conduct](#)
- [Entity categories](#)
