

Version vocabulary

This section is about the versions that describe the status of the document. We have introduced version information to make it possible to describe the Publication type without mixing the terms with version or status information. For example, the term "PeerReviewedArticle" can be split into *info:eu repo/semantics/article* and *info:eu repo/semantics/accepted*.

The version vocabulary is derived from <http://www.lse.ac.uk/library/versions/>, which is a JISC funded project called VERSIONS (Versions of Eprints - a user Requirements Study and Investigation Of the Need for Standards). This project addresses the issues and uncertainties relating to versions of academic papers in digital repositories. VERSIONS aims to help build trust in open access repository content among all stakeholders and has developed a toolkit that can be found at: http://www.lse.ac.uk/library/versions/VERSIONS_Toolkit_v1_final.pdf

info:eu-repo/semantics/	Description
draft	Early version circulated as work in progress
submittedVersion	The version that has been submitted to a journal for peer review
acceptedVersion	The author-created version that incorporates referee comments and is the accepted for publication version
publishedVersion	The publisher created published version
updatedVersion	A version updated since publication
