

Architectures

Architectures: Dutch Academic Information Domain

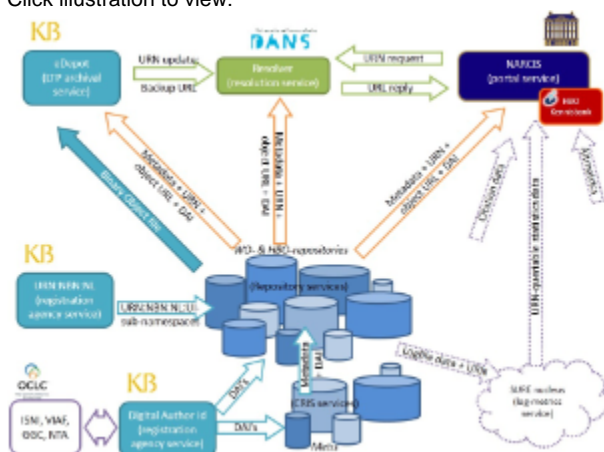

On this page several views on the architectures of the Dutch Academic Information Domain are given.

Most of these are interconnecting information spheres using standards and application profiles due to intensive collaboration among all the parties.

Dutch Repository Infrastructure - A Simplified Overview

This shows the external targets who are dependent on harvesting information from the Dutch repositories.

Repository Services Infrastructure

Powerpoint presentation files for reusing and editing the pictures on the architectural views:

- [ARCHITECTUUR2009.pptx](#) (alternate view)
- [2012-09-24 ORIS presentatie.pptx](#) (illustrations used in [ORIS project](#))

The orange arrows in both illustrations represent the Application profiles involved for content provisioning.
