

Voorbeeld ExpressRoute opzeggen

Om een ExpressRoute op te zeggen moet u een aantal stappen in de Microsoft portal doorlopen:

Stap 1: Verwijderen van een ExpressRoute peering

Ga naar het overzicht van uw ExpressRoute en selecteer uw peering(s).

The screenshot shows the 'Private peering' configuration page in the Microsoft Azure portal. The left sidebar contains navigation options like Overview, Activity log, Access control (IAM), Tags, and Settings. The main content area is divided into 'Essentials' and 'Peering' sections. The 'Essentials' section displays the resource group 'GEANT-TEST', circuit status 'Enabled', location 'West Europe', and subscription name 'Azure ExpressRoute pilot'. The 'Peering' section shows a table with three rows: 'Azure private' (Enabled), 'Azure public' (Disabled), and 'Microsoft' (Disabled). The 'Azure private' row is highlighted. The right sidebar shows the configuration details for the selected peering, including Peer ASN (65000), Primary subnet (172.16.101.0/30), Secondary subnet (172.16.101.4/30), and VLAN ID (50). It also displays traffic statistics: PRIMARY BYTES IN/OUT (8.63 MB in / 27.69 MB out) and SECONDARY BYTES IN/OUT (7.73 MB in / 27.37 MB out).

Verwijder deze peerings door op "Delete" te klikken.

The screenshot shows the 'Delete ExpressRoute peering' confirmation dialog in the Microsoft Azure portal. The dialog asks: 'Do you want to delete the peering 'AzurePrivatePeering' from ExpressRoute 'GEANT-test-circuit'?'. There are 'Yes' and 'No' buttons. The 'Yes' button is highlighted. The background shows the same 'Private peering' configuration page as the previous screenshot, but the 'Delete' button is now visible in the top right corner of the configuration panel.

Microsoft Azure GEANT-test-circuit Private peering

Deleted ExpressRoute peering
Successfully deleted ExpressRoute peering 'AzurePrivatePeering'.

2 new updates
The following updates are now available: General availability: Temporal tables in Azure SQL Database; Azure DevTest Labs: Manage your data disks

Peer ASN
65000

Primary subnet
172.16.101.0/30

Secondary subnet
172.16.101.4/30

VLAN ID
50

Shared key

PRIMARY BYTES IN/OUT
8.63 MB in / 27.69 MB out

SECONDARY BYTES IN/OUT
7.73 MB in / 27.37 MB out

Get ARP records

TYPE	STATUS	PRIMARY SUBNET	SECONDARY SUBNET
Azure private	Enabled	172.16.101.0/30	172.16.101.4/30
Azure public	Disabled	-	-
Microsoft	Disabled	-	-

Step 2: Verwijderen van de ExpressRoute

Als SURF uw ExpressRoute ge-decommissioned heeft dan kunt u uw ExpressRoute verwijderen. Selecteer uw ExpressRoute circuit en klik op "Delete". Als deze actie bevestigd wordt dan heeft u uw ExpressRoute succesvol verwijderd.

Microsoft Azure GEANT-test-circuit

Delete ExpressRoute circuit
Do you want to delete the ExpressRoute circuit 'GEANT-test-circuit'?

Yes No
