

Availability and Sessions

The following articles contain background information about the availability of and sessions in SURFconext. Here you will find [more on sessions and what they are as well as how long they can last](#), how do sessions work in the SURFconext authentication infrastructure and when and why do I need to log in again? Also, we are working to ensure the highest possible availability of the platform, so that the risk of failure is minimal. You will find more on [how we deal with that](#). Use the navigation on the right to navigate through these pages.

Please note that some pages are only available in Dutch.
