**Live and on-demand video platform: Customizable server software powering reliable rich media streaming of high-quality video and audio to any device, anywhere. Support for rich media recording, video uploads with transcoding. IEEE-LOM compatible media repository with enterprise integration.**

## License

Blackboard can be obtained with a SURFmarket campus license. You will need an account for SURFmarket.nl to view the SURFmarket information about this product.

## Attributes

See the SURFconext Dashboard for SAML attribute requirements or read our attributes page. Attributes needed in the IdP configuration and forwarded by SURFconext to Presentations 2GO are:

- urn:mace:dir:attribute-def:uid
- urn:mace:dir:attribute-def:displayName
- urn:mace:dir:attribute-def:mail
- urn:mace:dir:attribute-def:eduPersonTargetedID
- urn:mace:dir:attribute-def:eduPersonAffiliation
- urn:mace:dir:attribute-def:sn
- urn:mace:dir:attribute-def:cn

## Single- or Multi-tenancy

Presentation2go is a single tenant service. The service can be installed on-premise and is also available as a cloud service. For cloud services the url will be: *.presentations2go.eu. But you can create your own HOST.DOMAIN.EDU and have your DNS pointed to the cloudservice. You have to provide your own certificate in this case.

## Configuration

To make a connection with SURFconext for Single Sign-On purposes you will need to provide SURFconext with the appropriate metadata. The link to the metadata of your presentation2go instance is: https://HOST.DOMAIN.EDU/p2g/metadata.ashx

The vendor assists with:

- installation on-premise
- The SURFconext connection process. This concerns attributes, metadata and contact with support@surfconext.nl.

# Provisioning

Pprovisioning should be done in the application with the administrator interface. It is also possible to automate the provisioning through .csv import or a SOAP-interface.

# Other

## HARDWARE

The service will be installed on Windows 2008 R2 with a local or remote MS-SQL database. The service can run on virtual machines with at least 2CPU's, 4GB RAM and sufficient storage.
