

Connect Google Workspace to SURFconext

An institution may start using Google Workspace (formerly [G Suite](#), formerly [Google Apps](#)) as a communication and collaboration tool for its students and employees. An institution can manage their own Google Workspace domain. Google Workspace for education contains [many modules](#).

SURFconext can be used to provide federated login and group memberships to the Google Workspace domain, as well as SSO with other SURFconext connected services. This wiki is a starting point with technical and non-technical information on how to connect to Google Workspace.
