

eduid API

A Serviceprovider can use an API to retrieve extra information on a user, after the user has approved this. The approval is done by a consent screen in the OIDC-gateway. The eduid Resource server (client id *myconext.rs*) needs to be connected to the Relying Party by Surfconext support. The Relying Party needs to request the correct scope(s).

Available API's:

Endpoint	Parameters	Benodigde scope	Beschrijving	Antwoord
https://login.eduid.nl/myconext/api/eduid/eppn	schachome (Add <i>?schachome=instelling.tld</i> to retrieve only the eppn of the user at this institution)	eduid.nl /eppn	If the user has linked an institution , this will request the eppn(s) for the current user at these institutions	eppn schachome
https://login.eduid.nl/myconext/api/eduid/eduid	-	eduid.nl /eduid	Retrieves the targeted eduid-number for the requesting Relying Party	eduid
https://login.eduid.nl/myconext/api/eduid/links	-	eduid.nl /links	Returns an array of all linked accounts for the user	schachome eppn displayname

A testing environment for these requests is available at <https://login.test.eduid.nl/myconext/api/>*
